Let the experts take the “wheel”!

Information security management has become an area of expense and complexity. Organizations are concerned with the current state of their information security program and have aggressively sought out firms that can help them in protecting the confidentiality, integrity, and availability of their data.

Security management requires various levels of governance to ensure consistency and seamless integration into an established corporate environment. As an operations management partner, Sentigy can ease the burden of implementing and managing the security function, and can also lend expertise in streamlining processes for maximum efficiency and effectiveness.

Sentigy utilizes best practices to manage client security operations. More than just administration and monitoring, we use Sentigy PathwaysSM, our proprietary business optimization tool, to determine exactly where your company stands and to align the security strategy with client business objectives. We also offer services in security analysis, design and integration.

Sentigy can provide assistance in each phase of security operations management:

Strategic Alignment

- Strategy Analysis
- Strategy Development

Analysis and Design

- Design Review
